DATA & ANALYTICS SPECIALIST | BUSINESS INTELLIGENCE | PERFORMANCE REPORTING | DASHBOARD DEVELOPMENT

PROFESSIONAL SUMMARY

Data & Analytics professional with more than two years of experience designing reporting systems, consolidating multi-source data, developing dashboards, and transforming complex datasets into actionable insights for strategic decision-making. Skilled in KPI framework development, performance monitoring, data integration, data visualization, and reporting automation using Power BI, Looker Studio, Google Analytics 4 (GA4), SQL, Python, Excel, and GIS tools. Proven ability to manage datasets covering more than 5,000 beneficiaries and agricultural producers, reduce reporting time by over 80% through automation, and collaborate across multidisciplinary teams to improve organizational performance, data quality, and evidence-based decision-making. Currently serving as Supervisor of the Traceability System at Virunga National Park, leading data analytics, dashboard development, and digital monitoring initiatives that drive evidence-based decision-making and operational excellence across large-scale traceability programmes.

CORE COMPETENCIES

- Data Analytics
- Business Intelligence
- Dashboard Development
- KPI Framework Development
- Data Visualization
- Google Analytics 4 (GA4)
- Power BI
- SQL
- Python
- Looker Studio
- Marketing Analytics
- Performance Reporting
- Data Integration
- Stakeholder Management
- Cross-functional Collaboration

TECHNICAL SKILLS

- Analytics & BI: Power BI, Looker Studio, Google Analytics 4 (GA4), Excel, Google Sheets
- Programming & Data: SQL, Python, Data Automation, ETL Processes, Data Pipelines
- Data Collection: Kobo, ODK, DHIS2
- Geospatial Analysis: ArcGIS, QGIS, GIS Analysis

PROFESSIONAL EXPERIENCE

Virunga National Park

Supervisor of the Traceability System

November 2024 - Present

- Consolidated and managed datasets covering more than 5,000 agricultural producers, ensuring data integrity and centralized reporting across multiple operational sites.
- Developed automated reporting solutions and centralized dashboards using Power BI, SQL, Python, and GIS, reducing reporting time by more than 80%.
- Designed interactive dashboards and KPI frameworks to enable real-time performance monitoring and evidence-based decision-making.
- Analyzed operational and traceability data to identify trends, bottlenecks, and opportunities for process improvement.
- Implemented data quality assurance frameworks to improve accuracy, consistency, and reliability across monitoring systems.
- Generated analytical reports and actionable recommendations for senior management to support strategic planning and operational performance.
- Collaborated with Microsoft AI Lab and multidisciplinary teams to strengthen AI-enabled analytics and data integration processes.
- Trained more than 20 supervisors and field enumerators on digital data collection systems, reporting standards, and data quality procedures.

Give Hope Center

Data & Reporting Manager

February 2024 - November 2024

- Managed data collection, validation, analysis, and reporting activities for sustainability and operational performance indicators.
- Developed KPI monitoring tools and reporting frameworks to strengthen performance measurement and accountability.
- Analyzed quantitative and qualitative datasets to identify trends and support strategic decision-making.
- Produced dashboards and analytical reports to communicate insights to technical and non-technical stakeholders.
- Implemented data management processes that improved data quality, consistency, and reporting efficiency.

- Coordinated reporting activities across multiple stakeholders and facilitated evidence-based programme management.
- Trained staff and community groups on data collection methodologies, monitoring systems, and reporting standards.

SELECTED PROJECTS

- Developed a GA4 measurement framework and UTM tracking structure to improve campaign attribution and performance monitoring.
- Designed interactive Looker Studio dashboards that consolidated multi-source marketing data into centralized reporting solutions.
- Built donor journey and membership funnel analyses to identify engagement patterns and conversion opportunities.
- Analyzed cross-channel campaign performance and generated actionable insights to support strategic decision-making.
- Developed unified reporting templates in Google Sheets to streamline KPI tracking and stakeholder reporting.
- Built AI-powered monitoring systems and automated reporting pipelines using Python and Power BI.

EDUCATION

Bachelor's Degree in Agricultural Sciences

Catholic University of Bukavu (UCB)

Field of Study: Natural Resource Management, Ecosystems and Biodiversity

CERTIFICATIONS

Learning AI Through Visualization

Columbia+ | January 2026

- Completed coursework on artificial intelligence concepts, visual analytics, and data-driven decision-making through visualization techniques.

AWS Certified AI Practitioner (In Progress)

Expected: 2026

- Developing foundational expertise in artificial intelligence, machine learning concepts, and responsible AI applications.
